EXPERIENCE

BCG Platinion - Visiting Associate - IT-Strategy Consulting

10/2020 – 12/2020 | Munich, Germany

- Developed a cloud-focused IT-strategy and for a major German energy producer to tackle challenges related to merger activities

Microsoft - Intern - Customer Success

04/2020 – 09/2020 | Munich, Germany

- Worked on a new strategy to increase cloud adoption among Microsoft's non-strategic customers in Germany. The development process focused on research over trending Azure use cases and their deployment
- Coordinated a team of 6 people and took ownership of processes and deliveries that affect ~60 Customer Success Account Managers

Lufthansa - University Project - Crew Optimization

10/2019 – 02/2020 | Berlin, Germany

- Developed a prototype to streamline the crew-pairing process, able to make predictions about future flight routes based on a neural network with Keras and a dataset with over 200.000+ instances from company sources. Prototype is accessible by APIs and a dashboard using Django

Volkswagen Group Japan - Intern - IT Services

03/2018 – 09/2018 | Toyohashi, Japan

- Managed and participated in a team of 4 interns over the development of a mobility service app mock-up including a presentation in front of the Japanese executive board level
- Customized the Japanese company intranet to simplify finance processes. Held meetings with several departments and implemented the findings using HTML5, CSS3, and JavaScript

Porsche - Intern & Thesis - Business Admin. & IT-Management

03/2017 – 02/2018 | Leipzig, Germany

- Designed and optimized company-wide processes for an upcoming quality assurance software using EPCs
- Completed my bachelor's thesis over the implementation of the new General Data Protection Regulation at Porsche's factory in Leipzig
- Analyzed internal processes about the usage of customer and employee data and described countermeasures to the data protection officer

Materna - Undergraduate employee - Applications & Portals

07/2016 – 12/2016 | Dortmund, Germany

- Simplified Jenkins continuous integration for the Scrum process by setting up webservice in C# using SOAP APIs
